We Invite Your Patronage

The continued and growing interest in gardens and gardening from the smallest rural home owner to the proprietor of the largest country estate emphasizes more and more the responsibilities of a reputable seed store. Naturally with the increased knowledge of plant varieties, cultural secrets, fertilizing elements and intensive color scheming, the gardener must be most particular with his patronage.

Thirteen years of experience catering to discriminating customers and direct contact with the largest seed growers recommends THE GARDEN HOUSE to all who must buy with confidence. Quality above all else is identified with every individual item of our entire stock. It is our policy to not only supply everything required for horticultural pursuits but to have that thing typify the best that can be obtained.

Each year increases our field of service to many new gardeners who have found THE GARDEN HOUSE a complete base for their outdoor operations. Specializing in horticultural needs exclusively enables us to offer superlative service that has retained the confidence of amateur and professional enthusiasts from the very beginning.

We extend thanks to our friends who have faithfully reposed confidence in THE GARDEN HOUSE and invite earnest consideration from those whose patronage we have not yet but hope soon to enjoy.

Quality Lawn Grass Seed

Could anything be more attractive or more essential to a country home than a beautiful, green well kept lawn. The lawn adds a velvety dress of charm, the finishing touch, to a rural home. The surest method of obtaining the best results with grass is to begin right by using only quality seed. Nothing is to be gained by inexpensive and inferior mixtures when the slight additional cost of better seed will repay tenfold in ultimate results. We highly commend our mixtures to those desiring better lawns.

SUNNYSIDE LAWN GRASS SEED is a specially prepared mixture made to our formulae and so proportioned as to produce an even green, hardy and permanent turf. We recommend sowing 1 lb. to 250 sq. ft. and 200 lbs. to the acre. 1 lb., 55c; 5 lbs., \$2.50; 10 lbs., \$4.50; 20 lbs., \$8.50; 100 lbs., \$40.00.

SHADYSIDE LAWN GRASS SEED. A mixture of grasses carefully selected that have proven their hardiness and resistance to adverse growing conditions. Where a lawn is required in shady locations, under trees, north side of building, and protected areas, SHADYSIDE will produce a rugged and lasting result. We recommend sowing 1 lb. to 250 sq. ft. and 200 lbs. to the acre. 1 lb., 65c; 5 lbs., \$3.00; 10 lbs., \$5.75; 20 lbs., \$11.00; 100 lbs., \$52.50.

Special Grasses and Clovers

ALFALFA. The mainstay of the dairyman. Produces more green forage, more pasture and more dry hay per acre than any other variety of hay or grass. 60 lbs. to the bushel. Sow 20 lbs. per acre. 1 lb., 50c; 5 lbs., \$2.25; 25 lbs., \$10.50; 100 lbs., \$40.00.

ALSIKE CLOVER. Somewhat smaller in growth than Red Clover but used frequently with Timothy or other clovers for hay. Alsike hay is of fine texture and excellent quality. 60 lbs. to the bushel. Sow 15 lbs. per acre. 1 lb., 45c.; 5 lbs., \$2.00; 25 lbs., \$9.00; 100 lbs., \$34.00.

CRIMSON CLOVER. Used almost exclusively as a soiling or green manure crop. Can also be used for hay but as a green manure crop it matures early in the spring and when plowed under decays rapidly and becomes quickly incorporated with the soil. 60 lbs. to the bushel. Sow 20 lbs. per acre. 1 lb., 25c.; 5 lbs., \$1.00; 25 lbs., \$4.75; 100 lbs., \$18.00.

KENTUCKY BLUE GRASS. Thrives well on rich, fertile, limed soil. Kentucky Blue Grass is invaluable when incorporated with a lawn mixture and when sown for pasturage its quality food value is unsurpassed. 20 lbs. to the bushel. Sow 30 lbs. per acre for lawns. 1 lb., 70c.; 5 lbs., \$3.25; 25 lbs., \$15.50; 100 lbs., \$60.00.

MAMMOTH RED CLOVER. Similar to Medium Red Clover but makes a larger, coarser growth and more extensive root system. 60 lbs. to the bushel. Sow 20 lbs. per acre. 1 lb., 50c.; 5 lbs., \$2.25; 25 lbs., \$11.00; 100 lbs., \$42.50.

MEDIUM RED CLOVER. The most largely grown and generally useful legume crop in America. Makes fine hay, good pasturage and can be used for plowing under. 60 lbs. to the bushel. Sow 20 lbs. per acre. 1 lb., 50c.; 5 lbs., \$2.25; 25 lbs., \$11.00; 100 lbs., \$42.50.

NEW ZEALAND (CHEWINGS) FESCUE. A perfect grass for golf greens, tennis courts or included with other grasses for a fine lawn mixture. Makes a compact solid turf of dark green color, hardy and heat resistant. 27 lbs. to the bushel. 1 lb., 70c.; 5 lbs., \$3.25; 25 lbs., \$15.50; 100 lbs., \$60.00.

PERMANENT PASTURE MIXTURE. Contains Timothy, Red Clover, Red Top, etc., in proportions so blended as to afford a bumper crop of hay or perfect pasturage for grazing. 1 lb., 45c.; 5 lbs., \$2.00; 10 lbs., \$3.75; 25 lbs., \$9.00; 100 lbs., \$35.00.

RED TOP (FANCY RE-CLEANED). No other grass will grow under as great a variety of conditions as Red Top. It will do well on almost any type of land forming a dense sod constituting one of the best grasses for pasturage or to sow in conjunction with other lawn grasses. 25 lbs. to the bushel. Sow 20 lbs. to the acre. 1 lb., 50c.; 5 lbs., \$2.25; 25 lbs., \$10.50; 100 lbs., \$40.00.

SOUTH GERMAN CREEPING BENT. A very fine leaved creeping grass used extensively for golf greens and very fine lawns. Forms a beautiful, rich, soft carpet of turf, delicate in texture and color. 1 lb., \$1.50; 5 lbs., \$7.00; 25 lbs., \$32.50; 100 lbs., \$127.50.

TIMOTHY. A tall, quick growing grass used extensively in mixtures sown for hay or pasture purposes. 45 lbs. to the bushel. Sow 25 lbs. to the acre. 1 lb., 25c.; 5 lbs., \$1.00; 10 lbs., \$1.75; 20 lbs., \$3.25; 100 lbs., \$16.00.

WHITE DUTCH CLOVER. Used extensively for incorporating with a lawn mixture. Many prefer a good percentage of clover in their lawns, the attractive dark green color adding a rich and pleasing tone. 1 lb., 70c.; 5 lbs., \$3.25; 10 lbs., \$6.25; 20 lbs., \$12.00; 100 lbs., \$57.50.

Quality Vegetable Seeds

Artichoke

General List of Flower Seeds

Annuals.

Annuals are raised from seed each year, mature their flowers and then die down the same season. The seeds can be either started indoors early or planted in the open ground when weather permits. They offer some of our finest cut flowers and can be used for all kinds of garden effects.

Biennials.

The seeds of true biennials must be sown between June 1st and September 1. With slight protection over the winter months they will bloom the following season and then die.

Perennials.

Perennials flower the following year after sowing and continue to thrive and bloom every succeeding season. They are perfectly hardy and stay in the open ground all winter. For borders and old fashioned gardens, perennials offer the most excellent subjects.
